Company Overview

Who we are and how we create value

Supreonix is an international technology solutions company serving businesses, government organizations, schools, SMEs, enterprises, NGOs, public institutions and individual professionals across Kenya, Africa and worldwide markets.

The company operates as a digital transformation ecosystem, combining software engineering, AI systems, corporate IT services, cloud technologies, cybersecurity, digital marketing, professional training and internal product platforms. Supreonix helps clients move from ideas and operational challenges to deployed systems, managed technology and measurable business outcomes.

We do not only build one-off websites or deliver isolated projects. We develop productized platforms that can be customized for clients, deployed faster, maintained centrally, and extended into complete digital transformation programs.

10+ Industry Solutions	100% Kenyan Based	2025 Year Established	∞ Future Potential
----------------------------------	-----------------------------	---------------------------------	------------------------------

Positioning

- International software and technology partner with strong Kenya and Africa execution capacity.
- Builder of practical platforms for education, finance, commerce, HR, payments, public services and enterprise operations.
- Provider of end-to-end implementation: strategy, design, engineering, deployment, training, support and improvement.
- Technology ecosystem with both client services and internal product platforms.
- Product thinking combined with client service delivery, enabling reusable platforms and tailored implementations.

What We Deliver

From a single website to a full enterprise platform, Supreonix covers the complete technology lifecycle – strategy and advisory, design and engineering, deployment and integration, training and onboarding, and long-term managed support. Every engagement is structured so that clients gain dependable systems, clear documentation and a partner who remains available long after launch.

Core Business Areas

The services that make up our delivery capability

Web & Software Development

Software Engineering

Business websites, custom business systems, web applications, mobile applications, enterprise software, portals, dashboards and API integrations.

AI & Automation

Artificial Intelligence

AI agents, intelligent assistants, analytics, automation workflows, content tools, data processing and business intelligence systems.

Corporate IT Services

Infrastructure

IT consultancy, digital transformation planning, ICT infrastructure management, corporate systems advisory and managed IT operations.

Cybersecurity

Security

Security consulting, risk reviews, secure deployment, access control, awareness training and protection planning for modern organizations.

Cloud & Infrastructure

Cloud

Server deployment, cloud architecture, hosting guidance, networking, CCTV systems, ICT equipment and infrastructure implementation.

Digital Marketing & Branding

Growth

SEO, social media marketing, brand design, online advertising, content strategy and digital growth campaigns.

IT Support & Maintenance

Managed Support

Remote support, on-site support, troubleshooting, system maintenance, user support and post-deployment operations.

Professional Training

Capacity Building

Corporate training, digital skills development, software skills, cybersecurity, AI, cloud, and practical technology capacity building.

Consultancy & Advisory

Advisory

Technology strategy, business process analysis, digital transformation advisory, procurement support, tender support and project planning.

Project Management

Delivery

ICT project planning, implementation, deployment coordination, documentation, delivery tracking and stakeholder communication.

Products, Platforms & Internal Ecosystem

A portfolio supporting commerce, education, HR, payments, AI and enterprise operations

Supreonix Marketplace

Vendors · Payments

Commerce platform for digital products, services, vendors, software offerings and business storefronts.

AssetLux

Assets · Listings

Asset, property and premium listing platform for structured transactions and digital listings.

Onix Resume Builder & ATS

HR · Recruitment

Resume builder, applicant tracking, recruitment workflow and HR automation platform.

Nix CBC Management System

Education · CBC

School management system for CBC records, learning workflows, portals, reporting and education administration.

Modern POS

POS · SME

Retail sales, inventory, receipts, branches, staff control, reporting and business analytics platform.

Payment Gateway Solutions

M-Pesa · Billing

M-Pesa and online payment workflows with transaction tracking, callbacks, reconciliation and automated confirmations.

Supreonix AI & AI Agents

AI · Automation

AI tools, assistants, automation agents, analytics, workflow intelligence and business productivity systems.

Government & Enterprise Portals

Public Sector

Secure workflow portals, citizen services, internal records, departmental dashboards and reporting systems.

CSR WorkOS

Support · QA

Internal customer support, QA, service workflow, project communication and developer handoff portal.

Admin Command Center

Governance

Central administration environment for users, apps, analytics, domains, communication channels and governance.

Each platform can be launched as a standalone product or combined into a wider digital transformation program, with deployment, training, maintenance, hosting and long-term product improvement provided by Supreonix.

Delivery Model

- **Discovery and needs analysis** – define the business problem, users, workflows and measurable outcomes.
- **Solution design** – covering scope, architecture, user experience, implementation plan and deployment requirements.
- **Agile build and review cycles** – with stakeholder feedback, quality assurance and documentation.
- **Deployment, onboarding and training** – followed by support and continuous improvement after launch.
- **Structured communication** – through project channels, QA feedback and internal handoff workflows.

Product Families We Can Deploy

Each product can be launched as a standalone platform or combined into a wider digital transformation project.

Education Platforms

Education

School systems, LMS, exams, portals and e-learning.

Commerce Platforms

Commerce

Marketplaces, stores, vendor tools, POS and inventory.

Workforce Platforms

Workforce

ATS, HR, recruitment, onboarding and employee workflows.

Finance Platforms

Finance

Payments, billing, donation systems, reconciliation and reports.

AI & Analytics Platforms

AI

AI agents, chatbots, automation, analytics, reporting and productivity tools.

Support Platforms

Support

Service desks, customer portals, issue tracking and SLAs.

Public Sector Platforms

Public Sector

County portals, approvals, digital services and tenders.

Security Platforms

Security

Monitoring, access workflows, cyber controls and audits.

Education

Sector

School management, CBC systems, LMS, e-learning, portals and institutional administration.

Healthcare

Sector

Patient workflows, records, websites, support systems and secure digital operations.

Finance

Sector

Payment workflows, reporting, integrations, customer systems and compliance-aware platforms.

Government

Sector

Digital public services, records, portals, dashboards and department workflow systems.

Commerce & Retail

Sector

E-commerce, POS, inventory, product management and digital sales systems.

Enterprise & SMEs

Sector

Custom software, automation, IT infrastructure, training and ongoing managed support.

Why Supreonix

- Broad technology capability under one ecosystem: software, infrastructure, AI, cybersecurity, marketing, training and support.
- Product thinking combined with client service delivery, allowing reusable platforms and custom implementations.
- Strong fit for tenders, institutional projects, enterprise workflows and long-term digital transformation programs.
- International positioning with practical execution capacity in Kenya and Africa.
- Structured internal operations through admin, CSR, QA, communication and project workflow portals.

Our Approach

1. Discover & Design

Understand

We dig into your goals, users and constraints, then shape a solution that fits your sector and budget.

2. Build & Integrate

Deliver

Our engineers develop, deploy and integrate your solution — software, cloud, security or infrastructure.

3. Train & Support

Sustain

We hand over with training, documentation and ongoing support so your team stays confident.

Our Core Values

Six commitments you will experience in every engagement.

Innovation

Value

Constantly exploring new technologies and approaches to deliver cutting-edge solutions.

Integrity

Value

Building trust through transparent communication and ethical business practices.

Excellence

Value

Committed to superior quality in every project and service we provide.

Collaboration

Value

Working closely with clients to understand needs and deliver optimal outcomes.

Future-Focus

Value

Scalable, adaptable technology designed for long-term growth and innovation.

Customer Care

Value

Responsive support and genuine partnership long after launch day.

Service Capability & Indicative Pricing

Representative offerings and price ranges (USD)

Supreonix delivers across nine broad service areas. The table below shows representative offerings and indicative price ranges. All prices are shown in USD for international clients; final pricing depends on scope, complexity and current exchange rates. Customized quotes and bulk discounts are available.

Service Area	Representative Offerings	Indicative Range (USD)
Web & Software	Business & e-commerce websites, web apps (CRM/ERP), mobile apps, APIs, UI/UX, redesign, maintenance	\$120 – \$4,000+ / project
Branding & Design	Logo design, company profiles, graphic design, motion graphics, video editing, business cards	\$16 – \$1,200
Digital Marketing	Social media marketing, paid ads, SEO, content, email automation, video marketing, analytics	\$40 – \$640 / campaign
ICT & Infrastructure	Networking (LAN/WAN), server setup & virtualization, cloud migration, ERP, POS, VoIP, smart office	\$80 – \$4,800+
Security Solutions	Cybersecurity, penetration testing, IT security audits, CCTV, access control, DR planning	\$120 – \$1,600+
Business Services	Company registration, KRA/VAT compliance, document management, HR & payroll, accounting setup	\$40 – \$1,600
Training & Courses	Web & mobile bootcamps, data science & AI, networking, cybersecurity, cloud & DevOps, PM	\$80 – \$800
Hardware & Technical	Computer repair, printer servicing, IoT setup, smart office automation, equipment leasing	\$24 – \$800
Bundles & Packages	Business Launch Pack, Growth Pack, Enterprise Pack	\$360 – quote on request

Note: Prices are converted from KES to USD at an approximate rate of 125 KES = 1 USD. Actual prices may vary based on project requirements and current exchange rates.
